

9 TIMES-TABLE AND DIVISION FACTS

1) How many grapes?

2) 9×2 ones =

9×2 tens =

9×2 hundreds =

3) $9 \times 2 =$

$9 \times 20 =$

$9 \times 200 =$

4) $210 - 21 =$

1) How many grapes?

$$9 + 9 + 9 + 9 + 9 = 45$$

$$9 \times 5 = 45$$

$$5 \times 9 = 45$$

2) 9×2 ones = 18 ones

9×2 tens = 18 tens

9×2 hundreds = 18 hundreds

3) $9 \times 2 = 18$

$9 \times 20 = 180$

$9 \times 200 = 1,800$

4) $210 - 21 = 189$

LET'S LEARN

$$9 + 9 =$$

$$2 \times 9 =$$

$$9 \times 2 =$$

$$\div 9 = 2$$

$$\div 2 = 9$$

$$9 \times 4 = \square$$

$$\square \times 9 = 108$$

3	6	9	12	15	18	21	24	27	30	33	36
---	---	---	----	----	----	----	----	----	----	----	----

× 3

9	18	27	36	45	54	63	72	81	90	99	108
---	----	----	----	----	----	----	----	----	----	----	-----

$$3 \times 4 = 12$$

$$9 \times 4 = 36$$

So if I know my 3
times-table I can
multiply that by 3

OR I can multiply
by 10 and then
subtract 1 lot

$$9 \times 5 = 45 \quad 9 \text{ lots of } 5$$

$$\begin{array}{l} 10 \times 5 = 50 \\ 50 - 5 = 45 \end{array} \quad \begin{array}{l} 10 \text{ lots of } 5 \\ \text{subtract one lot of } 5 \\ \text{makes } 9 \text{ lots of } 5 \end{array}$$

I know that $21 \times 10 = 210$
 $210 - 21 = 189$

Using what you know about multiplying by 9,
how could you solve this?

$$21 \times 9 =$$

21

I know that $21 \times 10 = 210$
 $210 - 21 = 189$

$21 \times 3 = 63$
 $63 \times 3 = 189$

$$21 \times 9 =$$

21

I know that $21 \times 10 = 210$
 $210 - 21 = 189$

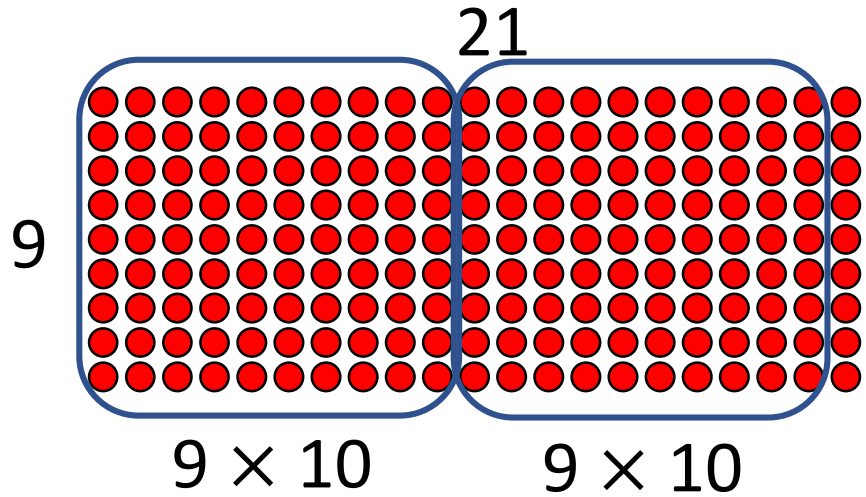

$21 \times 3 = 63$
 $63 \times 3 = 189$

2×9 is equal to 18 so
 20×9 is equal to 180
 $180 + 9 = 189$

$$21 \times 9 = 189$$
